- ➔ Simple, clear search interface for all users
- ➔ Multilingual and multi-user support
- ➔ Export and import records

Complete Automated  
**Library  
Management  
Software**

# Our library automation software is available in two technologies: **BARCODE SYSTEM and RFID SYSTEM**

## **BARCODE SYSTEM**

In Library Management system, whenever a student return or issue a book the system fetch the Barcode number and we can make entry of book in computer systematically. Library Management system helps in systematic management of books.

### **Tools Used in Barcode System**

**LABEL**

**SCANNER**

**PRINTER**

### **Benefits of using Barcode System**

- Improved inventory management
- Faster check-in and check-out facility
- Easy to sort books
- Reduced staff workload
- Increase accuracy and efficiency
- Improve circulation capabilities.

## **RFID SYSTEM**

Radio frequency identification (RFID) use electromagnetic fields to automatically identify and track tags attached to books. The chip and antenna attached together are called an RFID tag. The RFID reader or scanner converts the RFID tag information into digital information which will further seen in computer and stored for future use.

### **Tools Used in RFID System**

- ▶ RFID Tag
- ▶ Self Issuing Kiosk
- ▶ RFID Reader
- ▶ Drop Box
- ▶ RFID Gate
- ▶ Handheld header
- ▶ RFID Cards

### **Benefits of using RFID System**

- Scanning made easy with tags
- Faster check-in and check-out facility
- Easy to maintain inventory through wireless system
- Increase accuracy and efficiency
